

COOPER HEREFORD RANCH

48th ANNUAL PRODUCTION SALE

Tuesday, March 11, 2014

Genetics you can count on

Line One since 1947

SELLING

- : 85 POWERFUL YEARLING BULLS
- : 20 TOP QUALITY YEARLING HEIFERS
- : 7 YOUNG BRED COWS
- : 4 DONOR COWS

WELCOME

Here we are, approaching our 48th Production Sale. This is the 34th sale we've hosted at our ranch. Our first 14 sales were held in Great Falls. We'd truck around 25 yearling bulls up the night prior, and in conjunction with Holden Herefords hold a sale at the fair grounds. At the time, that seemed like a lot of work, and it really was. But I'll tell you, it doesn't seem as though things have gotten much easier. Technology certainly has enabled us to run our operation more efficiently, but it seems as though the work load keeps doubling each year. I guess that's just part of getting old. Since our first sale in 1966 the cattle industry has gone through many ups and downs, and time has brought about a lot of change in genetics and the Hereford breed in general. We can be thankful for the current low feed cost and record high cattle prices, but many of our fellow cattlemen experienced catastrophic loss this year whether from the blizzard that hit South Dakota, or from the drought currently plaguing California. Those of us in the cattle and farming industry can be thankful to have weathered the many storms of the past. We are certainly thankful to have made it through all the years of change and look forward to the promising future that awaits the Hereford breed. Cattle numbers across the nation are the lowest they've been since 1951. Many are looking to rebuild their herds and searching for good, functional cattle to do so with. We believe Herefords fit this bill and we're excited to see what the future holds for our breed.

We started line-breeding over 67 years ago based on the belief that by maintaining a strong performance line breeding program we could improve the uniformity and predictability in our cattle. Our intent was to provide a superior product to our customers. In order to achieve such results, we found it necessary to abide by a strict culling program. Just as we did then, we continue to cull our cattle rigorously and select for traits that keep our customers satisfied.

We are excited to offer you the top 75% of our 2013 bull calf crop, a uniform set of yearling heifers, a handful of outstanding young bred females, and four of our elite donor cows. The bulls were weaned on September 3rd. The group posted an average birth weight of 89 lbs., and an Adj. 205 day wt. of 720 lbs.. Once in the feedlot, they were fed a mixture of chopped hay, alfalfa silage, whole corn, and a mineral based protein supplement. Performance numbers were right on target again this year and resulted in an ADG on test of 3.50 lbs. which translated into an Adj. 365 day wt. of 1257 lbs. EPDs for the group are as follows:

CED(+2.7) BW(+2.5) WW(+51) YW(+82) Milk(+33)
M&G(+60) REA(+0.20) IMF(+0.06) CHB Index (\$23)

We obtained 50K GE-EPD data (see page 5 for more information) on over 50% of the bulls offered in our sale this year. We believe this data provides you, our customers with key information that should assist in selecting breeding stock that fits your herd. As in previous years, all bulls sell with complete ultrasound, pelvic and performance data. Dr. John Smith, DVM fertility tested and obtained scrotal measurements on all sale bulls. In our continuous effort to offer cattle free of any genetic defects, we have parent verified, IE tested, and diluter tested all sale cattle. Our entire cow herd has been verified and all donor cows have been 50 K GE-EPD tested. 2013 marked the first year we obtained 50K GE-EPD data on our entire heifer calf crop.

Videos of sale cattle are available and can also be viewed on our website. In an attempt to make our cattle more easily accessible to those not able to attend our sale, this year we have decided to use Superior Productions in addition to LiveAuction.TV. The sale will be aired on Rural TV (channel 232 on Dish network).

Cattle will be on display at our ranch March 7th, 8th, 9th, 10th and 11th. Please drop in at any time. Coffee and donuts will be served sale day morning with a lunch following at 12:00 MST. Please note, the sale start time has been changed to 1:00 PM MST. Following the sale, please join us for dinner at the Willow Creek Café from 5-9 PM.

Thank you for your continued interest and trust in our program. We look forward to seeing you.

Sincerely,
The Cooper Family

TERMS / CONDITIONS

All sales are cash unless arrangements are made with seller prior to the sale. Each animal will be sold to the highest bidder with the auctioneer settling any disputes. The animal becomes the property of the purchaser as soon as sold. Any death or injury thereafter falls upon the buyer. All animals in the sale are guaranteed breeders. If an animal fails to breed after a trial of six months, it may be returned to the seller in good condition and in compliance with the health regulations of Montana. The seller reserves the right to try said animal for six months, and if it proves a breeder, to return it to the buyer at the buyer's expense. If an adjustment is required, it will be made with a replacement animal of equal value or credit on the purchase of another animal. No adjustments will be made after (9) months of sale day. Any person attending the sale does so at his/her own risk. Neither the owners nor any person associated with the sale assumes any liability, legal or otherwise.

HERD HEALTH

Herd Health Program for Bulls & Heifers:

Birth: Alpha CD, Cl. Perfringens Type A Toxoid, Vitamin/Mineral, Microbial Supplement

45 days of age: Pulmoguard MPB

Branding: Vista Once SC, Vision 8/somnus

Summer: Ocuguard, Dectomax

Pre-Weaning: Vista Once SQ, Vision 8/somnus

Post-Weaning: Vista 5 SQ, Once PMH IN, Brucellosis

Vaccinate (heifers), Reprostar VL5 HB (heifers)

Pre-Breeding: Express FP 5, Reprostar VL5 HB (heifers)

- The bulls have passed a Breeding Soundness Exam and are guaranteed.
- All sale animals have been tested (IE) Free.
- Montana is once again Class Free with regard to Brucellosis. All cattle will meet the import requirements of their state of destination.

LiveAuctions.TV

Real-time bidding is available via the internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account prior to the sale. Please visit <http://www.LiveAuctions.tv> to create an account and request a buyer number. Instructions are available at <http://www.LiveAuctions.tv> to walk you through the account setup process. Buyers who would like to bid via the internet must register with LiveAuctions.tv two days prior to the sale.

Web Address <http://www.LiveAuctions.tv>
LiveAuctions.tv, e-mail address brad@LiveAuctions.tv

Please visit pg. 54 for information on using Superior Auctions to place your bid.

Trucking / Delivery

Bob Woolsey(406)671-0228
Bill Woolsey(406)670-1877

We are offering free delivery for the first 1,000 miles on purchases totaling \$5,000 or more. Deliveries will be to central points.

MONTANA BEEF CATTLE PERFORMANCE REGISTRY ASSOCIATION

INCORPORATED

**AGRICULTURAL BUILDING, MONTANA STATE COLLEGE
BOZEMAN, MONTANA**

July 11, 1957

Mr. J. L. Cooper, Jr.
Willow Creek, Montana

Dear Jack:

Congratulations! This is the first Commercial Herd certification of the Montana Beef Cattle Performance Registry Association. The directors were perfectly willing to authorize it after I described your set-up for 1956 in the meeting yesterday.

Now for 1958! Enclosed is a fieldsheet for the 1958 calves. Please fill in all the information which I have not entered and send it back to me soon. You must be sure and list the bulls and all the dope on them which you have. I crossed out #658 because you sold him to Noble, I think. Also show the cow numbers and the bull identity in each pasture. Be sure and include your two breeding dates because I expect to stop by before you take the bulls up.

Again, congratulations!

Yours truly,

E. P. Orcutt
Secretary

EPO.go
encl.

Montana Beef Performance Association (MBPA) was organized on March 12, 1956. The organization's main purpose was to provide progressive cattlemen a way to select premium cattle to raise while eliminating negative genetic factors. Under the leadership of E. Paul Orcutt, the first Executive Secretary, the MBPA's mission evolved from providing ranchers with a simple records keeping center to being a pioneer in herd selection methods. Eventually, many of MBPA's practices were adopted by the major cattle breed associations.

Cooper Hereford Ranch was one of the charter members of MBPA. Just as it was then, performance testing is of utmost importance to us. Keeping detailed performance records and abiding by a strict culling program have enabled us to produce solid, fundamental cattle that work in both commercial and registered programs. Cooper Hereford Bulls are the result of over 60 years of selecting for traits that keep our program at the forefront of the beef industry. We work hard day in and day out to improve our cattle so that our customers are satisfied and making a profit. Thank you for following our program and for investing in our cattle throughout the years. It means so much to have a sale barn full of cattlemen who choose our cattle to help carry their herd into the future.

EXPLANATION OF BREED EPDs

CALVING EASE – DIRECT (CE) :

CE EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

BIRTH WEIGHT (BW) :

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

WEANING WEIGHT (WW) :

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.).

YEARLING WEIGHT (YW) :

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

MATERNAL MILK & GROWTH (M&G) :

The MG EPD is a combination EPD. It is the MM EPD plus 1/2 the WW EPD. It has no accuracy value since it is simply a combination of two other EPDs. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

MATERNAL MILK (MILK) :

The MM EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MM EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MM EPDs do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughters' progeny due to milking ability. Daughters of a sire with a MM EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

SCROTAL CIRCUMFERENCE (SC) :

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

RIBEYE AREA (REA) :

REA EPDs reflect differences in an adjusted 365-day ribeye area measures based on ultrasound measurements of live yearling cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs

MARBLING (MARB) :

MARB EPDs reflect differences in an adjusted 365-day intramuscular fat (marbling) score based on ultrasound measurements of live yearling cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of intramuscular fat and therefore higher quality grades.

CEZ INDEX :

The Calving Easy Index is a general purpose index that focuses on identifying bulls that can be used on heifers and then ultimately the calves will be marketed through CHB. As you might expect, CE and MCE has significant weight in this index along with fertility. There is very little weight put on growth traits and less emphasis on carcass. Remember, this is a general index that is specifically designed to be used in a heifer program.

GENOMIC ENHANCED EPDs

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High Density (HD) panel that was built off of high accuracy Hereford sires. Each Animal that is tested has an updated set of EPD and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed (table below). The use of this information reduces your risk when buying, and helps to plan mating based off of all information available.

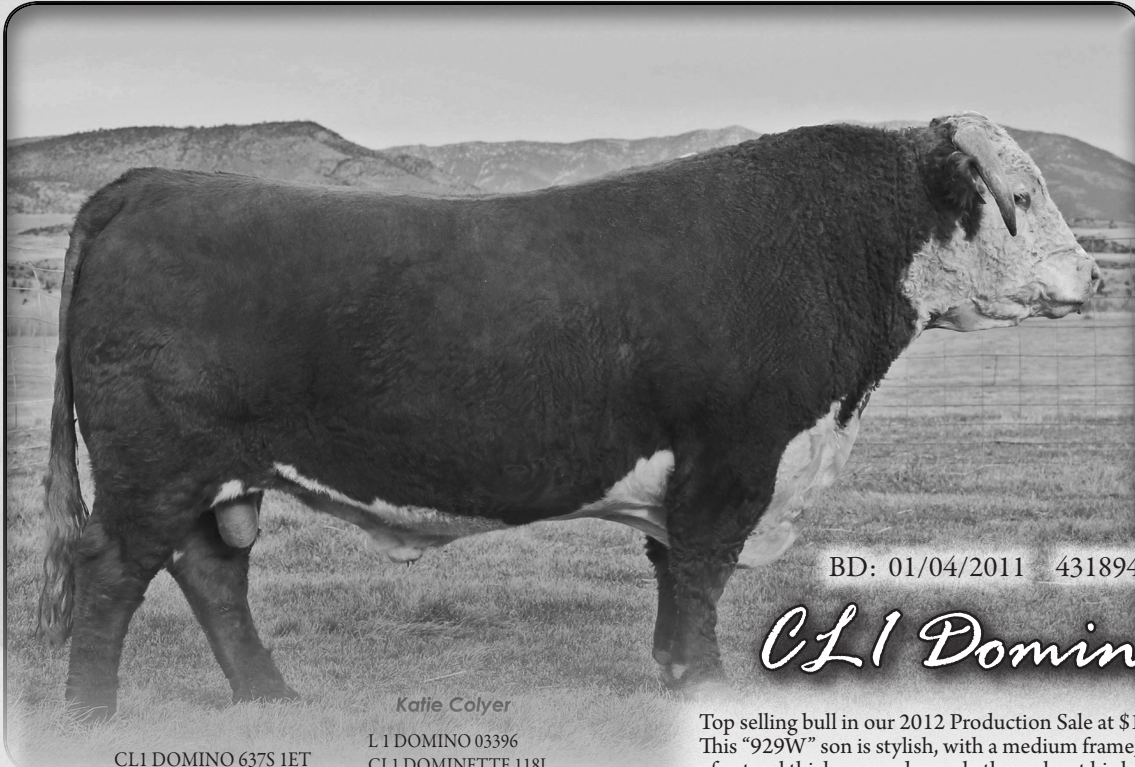

What are the advantages of GE-EPDs?

- Much higher accuracy EPDs for unproven cattle
- Provide reliable EPDs for traits that are difficult to measure
- Faster generation turnover with fewer mistakes
- Simple, easy to interpret results with "all-in-one" value

What is the value of EPD accuracy?

- Faster rate of genetic progress
- Feed and labor cost savings in seedstock development
- Opportunity cost of making the wrong decision
- Value of time in relation to earlier selection and more information for marketing and customer relations

Top selling bull in our 2012 Production Sale at \$160,000. This "929W" son is stylish, with a medium frame, smooth shoulders, and loads of natural thickness and muscle throughout his lower quarter. 105Y is the complete package, combining calving ease, performance, and maternal power. Dam "9140W" is a short marked "732T" daughter with a red neck and 100% eye pigment. She ranks in the top 1% of the breed for Milk (+43) and M&G (+68). First fifteen sons sell this year and exhibit many of 105's traits; putting pressure on birth weight while adding growth and lots of eye appeal. 105Y is a Trait Leader in CED, BW, Milk, M&G, Marbling and CEZ Index. Owned by LeForce Herefords (OK), Pedretti Herefords (CA) and Colyer Herefords (ID).

- Top 1% of the breed for Milk (+42) and M&G (+63); Top 2% CED
- Top 5% BW; Top 10% CEZ Index; Top 18% for Marbling.
- 782 lb. Adj. 205 day wt. (Ratio 109);
- 1352 lb. Adj. 365 day wt. (Ratio 109)
- Scanned a 13.67 inch REA and posted a 1.14 REA/100 lbs
- ADG on test of 3.97 lbs; 80 lb. actual birth weight

A big stout "860U" son with loads of natural thickness, length of body, depth of rib and muscle. "0130X" is one of the strongest maternal/performance bulls that we have produced. His pedigree couples two of our premier cow families in "440P" and "5142R". His progeny are sure to excel in the feedlot and in the pasture. Topped our 2011 sale at \$35,000. Owned by: Bowen Ranch(OR), Churchill Cattle Company(MT) & Stuber Ranch.(ND)

- Top 1% for Milk (+36) and M&G (+66); Top 8% for WW, YW and Scrotal

We purchased "0118X" in Holden's 2011 Productions sale. He is the complete package, with 100% eye pigment, and lots of natural thickness and eye appeal. He sires low birth weight calves along with added depth of rib and muscle to his progeny. First daughters are in production and look awesome. Sold after the 2013 breeding season to B&B Cattle Company(KS), Coleman Herefords(CO), and Jamison Herefords(KS).

- Trait Leader in Milk, M&G, and Mature Cow Weight
- Top 8% of the breed for Milk(+28)

TOP HERD BULL PROSPECT.

"330A" is a medium framed, thick-topped "144Y" son with great neck extension, loads of natural thickness, muscle, and eye appeal. He's got the look of a herd bull and a pedigree full of maternal power. Dam "617S" is a big cow with loads of capacity and volume. She ranks in the top 1% of the breed for Milk (+36) and M&G (+64).

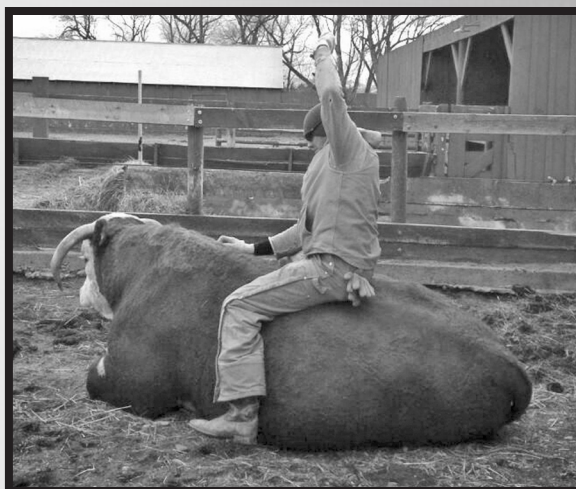

- 880 lb. weaning weight; 1277 lb. Adj. 365 day wt.
- Scanned a 13.89 inch REA; 1.16 inch REA/100 lbs
- Top 5% for Milk(+32) and M&G(+58)
- Maternal brothers sell as Lot 326A, 348A, 358A and 3137A

Cattlemen are discovering the added benefits of the F1 Hereford-based cross. Analysis from a study conducted at Circle A Ranch shows that producers who utilize Hereford bulls on Angus-based cows will have improved cash flow, increased herd size and more calves to sell.

visit www.cooperherefords.com to read how Hereford genetics are improving predominantly Angus based herds across the nation.

Commercial cowherds with Hereford influence are experiencing advantages in female fertility and longevity; and in calf vigor, average daily gains and feed conversion. Research has shown that a crossbred cow is 8% more efficient, lives 38% longer, and has 25% more lifetime production in pounds of calf weaned.

CALVING EASE + PERFORMANCE + MATERNAL

334A posted an impressive spread of numbers from BW to YW. A solid marked bull, with nice muscle, lots of natural thickness, and loads of eye-appeal. Pedigree is full of performance and maternal strength. Dam "148Y" is an awesome "9125W" daughter with a beautiful udder. She is short-marked, with nice pigment, and certainly a future donor cow prospect. "148Y" ranks in the Top 1% of the breed for Milk(+35) and M&G(+63); Top 8% for BW; Top 20% for CED and Marbling. **Grand Dam Sells as Lot 7136T**

Performance+Maternal+Carcass
 Another bull that posted impressive numbers from birth to yearling. This "0130X" son combines performance, maternal, and carcass traits into one complete package. 361A is a stout, short-marked bull. Dam has been a great cow out of "061" that ranks in the Top 10% of the breed for Marbling. Maternal Grand Dam sold to Iron Lake Ranch (TX) in our 2012 Sale.

TOP-NOTCH MATERNAL GENETICS.

This short-marked "105Y" son has a promising future. "364A" has as much maternal strength from top to bottom as any bull in the sale. A bull with 100% pigment that I've followed closely since birth. Dam is as good as they get; she ranks in the Top 8% or better in the breed for WW(+61), YW(+97), Milk(+40) and M&G(+71).

Great Grand dam sells as Lot 617S.

- 86 lb. Actual BW; ADG on test 3.63 lbs; 1284 lb. Adj. 365 day wt.
- Scanned a 14.9 inch REA; 1.35 inch REA/100 lbs; Pelvic 218 cm
- Top 1% of the breed for Milk(+42), M&G(+69)
- Top 16% for CED; Top 23% for WW and REA
- Ranks #4 in sale for Milk; #5 for M&G

TOP HERD BULL PROSPECT - LOTS OF MATERNAL STRENGTH

This "1108Y" son pulls all the desirable traits together. A stylish, clean-fronted bull with tremendous bone, length of body, spring of rib and muscling. "386A" is short-marked, with nearly 100% eye pigment, and backed by two tremendous cow families in "440P" and "617S". These two cows mirror one another in their EPD profile. Both rank in the top 1% of the breed for Milk(+35), M&G(+62), and Fertility; and the Top 8% in Marbling. **Grand Dam sells as Lot "617S"**.

Retaining 1/2 Possession 1/2 Interest

TOP PROSPECT.

A stylish bull that doesn't have many holes phenotypically. He is stout in structure, with nice depth and spring of rib, and is big through the top with good muscling. A free moving bull that travels out like a herd bull should. Dam "7157T" is a solid producer that sold to Jim Carr (NE) last fall. She ranks in the top 5% of the breed for Marbling. Her daughter sells as Lot 916W.

- 785 lb actual weaning wt.; ADG on test 4.12 lbs.; 1329 lb. Adj. 365 day wt.
- Scanned a 12.8 inch REA; 1.04 inch REA/100 lbs; Marbling ratio (119)
- Top 2% of breed for Milk(+35) and M&G(+60)
- Top 5% for Marbling; Pelvic 209 cm

CALVING EASE + CARCASS + MATERNAL

A top-end son out of "08542" that is very complete in his pattern. "3100A" has 100% eye pigment, lots of eye-appeal, length of body, depth of rib, a big top and good muscle expression. He's a bull that will grow on you with time!! Dam is a complete "9126J" daughter with a beautiful udder. She's as maternal as they get, ranking in the top 1% of the breed for Milk(+38) and M&G(+63). Dam "812U" sold to Colyer Herefords last spring.

Retaining 1/4 In-Herd Semen Interest.

CL1 Dominette 617S

DONOR COW Prospect

617S is one of our elite Donor cows. This "3113N" daughter is a Dam of Distinction whose pedigree is packed with breed leading genetics. 617S and her progeny boast volume, depth of rib, great udders and excellent pigment. A tailor-made maternal pedigree with an avg. weaning ratio of 108.2 on six calves. 617S has been flushed once a year over the past three years and produced an avg. of 20 quality eggs/flush. She is bred to 105Y and set to calve mid Feb. Retaining calf; set up for a May flush.

- Avg. BW Ratio (100.2); YW Ratio (102.8); REA Ratio (105.7)
- Ranks in the Top 1% of breed for Milk (+36) and M&G (+64)
- Sons sell as Lots 326A, 330A, 348A and 358A
- Seven daughters in production at the ranch.
- Daughter "1107Y" is Dam of Lot 364A; Daughter "1146Y" is dam of Lot 338A

Bred Cows

DONOR COW Prospect.

A superb, top-notch donor female with industry leading EPDs. 759T is a short marked "590R" daughter with a moderate frame and loads of muscle, eye appeal, and femininity. One of our most elite donor cows, she is sure to produce outstanding progeny that will phenotypically fit the show ring. Her progeny grossed over \$152,000 in our 2013 sale alone. Four daughters remain in our herd. 759T is bred to 215Z and set to calve in late January. Retaining calf. Set up for an April flush date.

- Sons sell as Lots 346A and 374A.
- Top-end daughter sells as Lot 354A.
- Maternal half sister sells as Lot 4126P

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that *all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com*

HERE'S HOW IT WORKS:

Turn in Bids Over the Phone.

This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-

3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid.

This is Superior's online bidding program for cattle buying. ***Please note that high speed internet is required – this is not for dial-up or satellite internet.*** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction

The sale will be broadcast via satellite on Dish Network channel 232 (RURAL TV). Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements.

Thanks to everyone, especially our neighbors & friends, who help make our sale run efficiently each year. We are so thankful to have such a loyal and professional crew.
